

A 3-year ANR-funded post-doctoral position starting January 2025 at the earliest, is available in the Oocyte Mechanics and Morphogenesis team at the CIRB, Collège de France, Paris (<https://www.college-de-france.fr/fr/oocyte-mechanics-and-morphogenesis>). We are looking for a candidate with an interest in interdisciplinary research, to study the dynamics of the oocyte plasma membrane and its role in oocyte fitness using a combination of cutting-edge approaches in cell biology (culture of oocytes and zygotes, microinjection experiments, live microscopy, image analysis) and biophysics (AFM, microfluidics, optical tweezers, modelling). If you are interested, please contact me ([marie-emilie.terret@college-de-france.fr](mailto:marie-emilie.terret@college-de-france.fr)).
